[linkedin.com/in/gabriel-alvarez7](https://www.linkedin.com/in/gabriel-alvarez7)

I'm a passionate software developer who can create amazing apps. I'm fascinated by how technology can make a positive difference in people's lives. I'm always eager to learn new things and stay updated with the latest trends. I enjoy tackling challenges and constantly improving my skills and knowledge as a professional and person.

## RELEVANT EXPERIENCE

.NET

### Full stack developer

Novatech | July 2022 - present

As a web developer in Novatech I contributed to the following projects:

- Developing CoeoSpaces, a web application that helps users find and book office spaces that suit their needs and preferences. I used React.js for the frontend, .NET for the backend and Azure for the cloud services. I worked closely with the product owner and the UI/UX designer to deliver a user-friendly and responsive interface that supports features such as search, filter, map, booking and payment.
- Developing a shipping and cost simulator for one of the largest aircraft parts distribution companies in the world. I used Node.js for the server-side logic, Next.js for the frontend framework, Redis for the caching and Azure for the cloud infrastructure. I developed a scalable and reliable solution that integrates with various APIs and databases to provide accurate and real-time estimates of shipping costs and delivery times for different aircraft parts and destinations.
- Developing and creating the main novatech website, I used Node.js for the backend and Next.js for the frontend, Azure static webapp for the frontend deployment and an AzureVM for the backend.

### Full stack developer

Applaudo studios | January 2022 - JULY 2022

As a web developer in Applaudo I contributed to the following projects:

- Developing web applications for the NBA team Golden State Warriors using Angular, React, Next.js, Firebase and Google Cloud. I was responsible for creating dynamic and responsive user interfaces, integrating with APIs and databases, and deploying and maintaining the applications on cloud platforms.
- Improving the performance and functionality of the main Walmart website using Next.js and Node.js. I worked on optimizing the loading speed, enhancing the accessibility and usability, and implementing new features and updates.

- Developing a content management system (CMS) called Alfred using Angular and Node.js. I participated in the design and development of the front-end and back-end of the CMS, which allows users to manage their properties with ease and efficiency using Vue.js and .Net.

## Full stack developer

World cloud services - Elaniin | August 2021 - January 2022

As a software developer, I contributed to the refactoring of the Accounting software of the Colombian Mercantile Exchange, a leading platform for trading financial instruments in Colombia. I used Angular, React and .NET technologies to enhance the performance, security and usability of the software, following the best practices of software engineering and agile methodology.

## Full stack developer

Estelio corporation | July 2019 - August 2021

My professional experience in Estelio includes developing web and mobile applications using Angular, Node.js, Ionic and FastAPI. Some of the projects I worked on are:

- web application and api for a medical management software that allows doctors and patients to access and update their records, schedule appointments and communicate securely.
- A web application for the remote control and management of electric meters that enables users to monitor and adjust their energy consumption, view their bills and report issues.
- A mobile application for managing business events that helps users to create, join and share events, network with other attendees and access event resources.
- An api that connects the Odoo erp and Moodle e-learning platform and allows data synchronization and integration between them.
- Educational material in Unity using C# and .NET that provides interactive and immersive learning experiences for students of various subjects and levels.
